Please find below and/or attached an Office communication concerning this application or proceeding.

DETAILED ACTION

This office action is in response to application 10/823,981, filed 4/14/2004. Claims 1-25 are pending in this application.

This application is in condition for allowance except for the following formal matters:

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the method steps of claims 1 and 17 must be shown in the drawings and described in the specification or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet; and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 2825

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 1 and 17 are objected to because: these claims fail to provide (fail to recite) a useful (i.e. tangible/practical/concrete) result (i.e. effect/improvement) in the claims (State Street, 149 F. 3d at 1373, 47 USPQ2d at 1601-02).
3. Claims 1 and 17 are objected to because: the term "MR" is not defined in the claims. "MR" needs to be defined and spelled out in both claims 1 and 17.
4. Claims 1, 6 and 17 are objected to because: the term "stripe fields" (lines 6-7 of claim 1; line 2 of claim 6; lines 7-8 of claim 17) lacks antecedent basis because the term is pluralized.
5. Claims 1 and 17 are objected to because: the terms "critical" and "non-critical" needs to be defined in claims 1 and 17.
6. Claims 15 and 25 are objected to because: the phrase "using angles" is unclear to what angles are being referenced.

With regard to the above objections: Although the claims are interpreted in light of the specification, limitations from the specification do not read into the claims.

Reasons for Allowance

8. With respect to claims 1 and 17, the prior art made of record fails to teach all the elements of claims 1 and 17. Specifically, the prior art made of record fails to teach:

A method of charge-balancing and continuously writing a wafer mask process, comprising:

- (a) providing a wafer with a plurality of rows;
- (b) writing a foreground field with charge-balancing features on the wafer, row-by-row, to build critical features for a plurality of MR devices on each row to define an MR stripe field;
- (c) writing additional critical features that define additional boundaries of the MR stripe fields between each of the charge-balancing features; and
- (d) writing a background field having non-critical features adjacent to each of the critical features.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suchin Parihar whose telephone number is 571-272-6210. The examiner can normally be reached on Mon-Fri, 8:30am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Chiang can be reached on 571-272-7483. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
